Welcome to the CBE

Digital Decodable Library

Welcome to the CBE Digital Decodable Library webpage. This resource has been developed to provide access to digital versions of decodable reading materials for CBE teachers and families. These digital offerings support both our understanding of decodable books and provide opportunities for beginning readers to access these reading materials at home and school. The materials will continue to be updated as the library evolves over time. The updates and improvements will be ongoing, so please check back often!
